WL-0600
HYDRAULIC REVERSIBLE PLOW

*Attachments depicted may include optional upgrades or custom configurations.

CRAIG™

With over 70 years of design evolution, this reversible plow stands as the benchmark in snow equipment for wheel loaders. Its fully floating frame adapts seamlessly to the road's contours, both laterally and horizontally, ensuring superior surface contact. Engineered for reliability, the plow features two heavy-duty trip springs on each side and centered oscillating cylinders, allowing operators to effortlessly adjust the plow for optimal performance.

- Trip moldboard standard; trip edge available
- Down pressure and float capable, with the use of down pressure/lift arms (standard)
- Reduced plow extension by means of two wide, flared cylinders
- Replaceable wear shoes and cutting edge for long wear life
- Available in Craig Quik key, OEM couplers, wing assembly, and Pin-on configurations
- Optional third valve required on machine
- Follows contours of the road
- Available with Craig Salt Saver
