T0600WP FOLDING WING PLOW

*Attachments depicted may include optional upgrades or custom configurations.

CRAIG™

The Craig Folding Wing Plow is a versatile snow-fighting solution, combining control, strength, and efficiency into one powerful tool. Designed for medium-sized wheel loaders, this plow is built for managing snow in paved parking lots or yards.

Machine will require a third hydraulic valve. The plow comes equipped with the Craig SPD Valve, an electric-over-hydraulic diverter valve, complete with in-cab controls, enabling the third-function hydraulics to operate the plow's angled moldboard and independently open and close each gate.

- Dual adjustable end gates - individually powered by powerful hydraulic motors
- Easily replaceable torsional trip edge springs allow the plow's cutting edge to trip when encountering objects
- Trip edge end gates are standard
- Adjustable spring float end gates to ensure consistent scraping of snow and ice
- In-cab controls included
- Reversible bolt-on cutting edge or Craig Salt Saver edge optional

Use the T0600WP as a...

- Box Plow - pushing snow long distances
- Reverse Box Plow - back dragging against doors or walls
- Reversible Plow – moldboad can be reverse angled
- Straight Plow – gates can be fully opened for max width
